### 1) Editor's Greeting:

Hello, everyone! This 14th issue of our free monthly email newsletter for Computer Education, Training, & Tutorial Resources gives you the latest Free WWW IT Training Resources that we have recently discovered and researched. My hope is that these free resources help you with your computer education and training and are tools to advance your IT career. Our main mission is the training of those less fortunate who are seeking to become computer literate, both technically and from a user's perspective.

If you have any suggestions, ideas, or feedback about this newsletter, feel free to email us at "[scott\\_turton@intelinfo.com](mailto:scott_turton@intelinfo.com)". We appreciate your feedback. Also, please send this to your friends and colleagues, if you think they would like it. It contains highly valuable information for anyone who is an IT professional or desiring to become one.

In this issue we describe and link to a total of 58 computer, IT and programming learning and tutorial web sites. By means of this email newsletter, you have knowledge of and access to these sites before our web site visitors do.

\*\*\*Our Current News\*\*\*

Our new \*Members Section\* contains the web's best computer and IT training resources and tutorials. This content is individually linked and presented in a way to expedite and facilitate your IT learning experience. We have done all the web research and presentation work for you so you can concentrate solely on your computer training. Please join, because I have set the price at the lowest possible level to make it affordable for everyone: just \$10 total for 2 months. The funds generated will assist us to help everyone seeking IT education and application development training. ## **9) Frequently Asked Questions about Technical Training:**

Each month Scott Turton will answer one of the frequently asked questions we receive about computer and technical training and career development.

October 2001 FAQ:

Do you have any tips to offer those who might be trying to separate the good free training sites from the less worthwhile ones?

Answer:

The best ones are popular - so you should check out how many links they have on a search engine, such as google.com, by doing a search for "link:nameofsite.com". The more sites a site has linking to it, the better it usually is. You should be able to see right away if the site is offering good training content. Good content is well written, covers the area extensively (doesn't shortcut the material), and attempts to engage the student. If you are a newbie you really need to ask questions to someone who knows the answers. Sometimes, all you need is to ask your question to an expert on one of these sites: <http://www.infopackets.com> (more listed here: <http://www.intelinfo.com/cat2-2.html#compoutingnet>). Some free training sites do have live people available to answer your questions, but this is usually not the case.

I hope this helps you.
