1) Editor's Greeting:

Hello, everyone and welcome to our new subscribers! This is the 22nd issue of our free monthly email newsletter for Computer IT Education, Training, & Tutorial Resources, giving you the latest Free online IT Training Resources that we have recently discovered and researched. This newsletter is free to anyone subscribing (instructions at bottom, no username/password is needed). To access our member site, however, you do need a user name and password - registering as a member of Intelinfo.com costs $10 for six months, for more information please see below 'Become a Member of Intelinfo.com'.

My desire is that these free resources will help you with your computer education and training and are tools to advance your IT career. Our main mission is the training of those less fortunate who are seeking to become computer literate, both technically and from a user's perspective.

In this issue we describe and link to a total of 57 computer, IT and programming learning and tutorial web sites. By means of this email newsletter, you have knowledge of and access to these sites before our web site visitors do.

*** Current News ***

This issue of our newsletter contains a number of good free IT book sites in the 3rd section: New Free I.T. Books & Book Sites.

Also, here are our New Free Training and Learning pages for you, our newsletter subscribers:

Computer Security:
/free_computer_security_training_materials.html

Real Time and Embedded Systems:
/free_real_time_operating_systems_training_materials.html

Software and IT Project Management:
/free_software_it_project_management_training_materials.html

I'd like to personally wish you the best of luck with your computer studies and learning.

Warm Regards,
Scott Turton
Newsletter Editor and Webmaster
http://www.intelinfo.com/

**"Learn New Skills and Increase Your Earning Power
- With FREE Computer Training!"**

*** Become a Member of Intelinfo.com ***

Our Members' Site contains the web's best computer and IT training resources and tutorials. This content is individually linked and presented in a way to expedite and facilitate your IT learning experience. We have done all the web research and presentation work for you so you can concentrate solely on your computer training. For a short FAQ, please see the end of this newsletter.

The total price to join as a member is only $10 total for 2 months, $18.50 for 4 months or $25.50 for 6 months. The funds generated will assist us to help all those seeking IT education and application development training. Here's the link to see what's available on our member's site and to sign up: http://www.intelinfo.com/sign-up/index.html

****

*** Free IT Training Materials and Books ***

This section of our site contains over 2,000 free IT, computer and programming training resource links:

*** Our Newly Researched Free Online Computer Training ***

Containing over 13,000 free IT training and tutorial resources, this section of our site is available only to our newsletter subscribers and web site members:

*** Free e-Book: "Understanding Computer Security" ***

Our new e-book contains the best information from U.S. government agency computer security papers and guides and presents it in a coherent and understandable manner. My hope is that this e-book will make computer security easier to learn. Click here to receive your Free Copy: http://intelinfo.hypermart.net/Understanding_Computer_Security.zip (553 kb). When unzipped it is a windows executable.

==

2) The Best New Free I.T. Training & Tutorial Sites:

This section of our newsletter contains the best new free IT training and tutorial sites that we have found and researched in the last few weeks. These resources will be added to our Free IT Training & Courses page at http://www.intelinfo.com/cat1.html, our Free IT Tutorials and Guides page at http://www.intelinfo.com/cat2.html, or to our members' site.

Virginia Tech Computer Science Online Modules:
http://courses.cs.vt.edu/~csonline/

This site presents to you multimedia course material with animations to assist learning key Computer Science topics in eight learning modules: Algorithms, Artificial Intelligence, Data Structures, Machine Architecture, Number Systems, Operating Systems, Programming Languages, and Software Engineering.

****

CU2000:
http://cu2000.too.it/

On this site you can find over 20 gigs of free IT reference guides, books and tutorials, free development tools. Areas covered include Java, C++, Windows 2000 and more. These pages: <http://www.crackinguniversity2000.it/docenews.html> and <http://www.crackinguniversity2000.it/programming.html> contain many free programming and IT learning documents, guides and books covering many areas.

****

Stephen Mc Kearney's Home Page:
http://www.smckearney.com/

Training and learning content about Database Systems and Advanced Databases, and Programming.

****

The Linux Tutorial:
http://www.linux-tutorial.info

This is a fairly detailed introduction to Linux, based on the book, "Linux User's Resource". It is intended as an introductory to immediate tutorial, though advanced users will also learn something.

****

Linux Powered.Com:
http://www.linuxpowered.com/

This site will help you to increase your knowledge of Linux and how it works by giving you access to free books, tutorials and manuals. Includes Linux security and networking training.

****

Linux Now:
http://www.linuxnow.com/

This is a very complete Linux reference site to study and learn from.

****

Mark's Lecture Material:
http://www.iu.hio.no/~mark/lectures/index.html

These training materials are very well presented in an understandable and coherent way. Covers Operating Systems, Unix, Systems Administration, Computer Security and C Programming.

****

Bitafterbit.com Online Resources:
http://www.bitafterbit.com/english/index.html

These are tutorials teaching you about ASP, PHP, Java, Perl, C++, Assembly language, AI, HTML, Javascript and more.

****

XML : Education : Tutorials:
http://www-105.ibm.com/developerworks/...

Many excellent tutorials are available on the XML zone at IBM's developerWorks web site.

****

A Simple Course on Microprocessors:
http://www.hkrmicro.net/modules.php?name=Sections&sop=listarticles&secid=2

Register for free to access this 21 lesson online course on microprocessors that covers the language of microprocessors, decimal vs. binary (and hex), micro commands, memory and addressing, using an assembler and simulator, BIOS and OS routines, interrupts, system resources, and more.

****

Introduction to Computers - A Beginners Guide:
http://www.grassrootsdesign.com/intro/

An illustrated general guide to computers and their uses, covering hardware, software, basic operations, health & safety, multimedia and more.

****

Macromedia Product Tutorials:
http://www.macromedia.com/resources/tutorials.html

Their samples and tutorials provide step-by-step guidance with the latest tips, tricks and demos to make the most of your Macromedia experience. Tutorials cover
- Authorware:
http://www.macromedia.com/resources/elearning/tutorials/authorware.html
- Director Shockwave Studio:
http://www.macromedia.com/software/director/productinfo/tutorials/
- Dreamweaver:
http://www.macromedia.com/software/dreamweaver/.../samples_and_tutorials.html
- Macromedia Flash MX:
http://www.macromedia.com/software/flash/productinfo/tutorials/
- Fireworks:
http://www.macromedia.com/software/fireworks/resources/samples/

- FreeHand:
http://www.macromedia.com/software/freehand/resources/tutorials/

****

Online Web Design Tutorial from Vanderbilt University:
http://www.vanderbilt.edu/create/tech/

This tutorial will show you how to create a great web site. Great
web sites have: 1) clear, concise organization; 2) timely,
original, well-edited content; and 3) an attractive, consistent
format.

****

Web Design in Seven Days:
http://download.com.com/3000-2125-4591737.html

Learn web designing with html in 7 complete lessons. This e-book
in pdf format includes sample code and html pages, exercises and
text material needed for a web design course.

****

Workshops on the Web and Online Guides:
http://lts.ncsu.edu/instruction/guides/index.html

These online workshops train you on HTML, Web Design, Web
Conferencing, Audio, Usability, Fireworks, Flash and Photoshop.

****

FreeAnswers.com:
http://www.freeanswers.com/

FreeAnswers.com lets you solve computer-related problems simply
by asking questions in plain, everyday language to access
knowledge bases from leading vendors.

****

Complete C:
A DOS program to learn and experiment with the C programming
language.

1 of 3:
ftp://ftp.simtel.net/pub/simtelnet/msdos/c/ccc1053a.zip

2 of 3:
ftp://ftp.simtel.net/pub/simtelnet/msdos/c/ccc1053b.zip

3 of 3:
ftp://ftp.simtel.net/pub/simtelnet/msdos/c/ccc1053c.zip

****

Defending the Enterprise: Hacker Methods and Countermeasures:
http://webevents.tpcnet.com/netiq/20020611/start/default.asp

Get the hand-to-hand tactics you need to combat and counter
hacker exploits. In this free Webcast on Tuesday, June 11, 2002,
you will learn as a live footprint attack is performed and find
out just how vulnerable you are to a vicious random attack.

****

Windows & .NET Magazines Web Seminars:
http://www.winnetmag.com/seminars/
These free online seminars enable you to attend a focused
editorial conference providing 60 minutes of educational talk and
demonstration - and give you the chance to put your questions to
the experts in real time.

Security Summit - Tuesday, June 4th:
http://www.winnetmag.com/seminars/security/
You know Windows 2000/XP suffers from security vulnerabilities.
This free one-day online event will help you address those
vulnerabilities. Learn from security experts where the problems
lie, how you can harden Windows security, and how you can use
hacker tools in your favor.

Raising Your Windows Availability - Thursday, June 6, 2002 - 11
AM EST:
http://www.winnetmag.com/seminars/veritas/
Learn how to squeeze the most availability from the Windows 2000
Server family and find out what kind of fault-tolerant disk setup
to use, what clustering is (and isn't) good at, and best
practices for boosting SQL and Exchange availability.

****

Microsoft .Net Framework SDK QuickStart Tutorials:
http://samples.gotdotnet.com/quickstart/

With these tutorials you'll learn what the .Net Framework
technology offers and you'll find information about features of
the .Net Framework technology, including how to put them
immediately to work.

===
===

3) New Free Computer IT Books, Publications & Book Sites

Some of these web resources will be added to our Free IT Books
page at http://www.intelinfo.com/free_computer_books.html and
some will be added to our members site.

PLT Online:
http://www.cs.uu.nl/~franka/ref

Programming language theory texts online - This is a collection
of programming language theory texts and resources, all of which
are freely available over the Internet.

****

The Guide to Digital Television, 3rd Edition:
http://www.digitaltelevision.com/publish/dtvbook/toc.shtml

A "what to do" book whose goal is to provide a practical guide
for the digital transition to help you make the right decisions.
It follows the typical production cycle from pre-production to
delivery and transmission.

****

Free Chapters: .netBooks:

http://www.dotnetbooks.com/

This site has several free chapters and references helping you learn and understand Microsoft .Net technologies, including ASP.net, Visual Basic.net and C#.

```
=============================================================
=============================================================
```

4) University Computer Science Course Sites Free to Browse and Study:

These web sites will be added to our Free University IT Course Webs page at
http://www.intelinfo.com/cat3.html

Software Engineering in Java:
http://www.cs.nyu.edu/courses/spring02/V22.0480-001/index.htm
http://www.cs.nyu.edu/courses/spring02/V22.0480-001/lectures.htm

Click on the Lectures link and learn about Object-oriented programming & design, UML, Design Patterns, Model-View-Controller, User Interface Concepts in Java, Threads in Java, and various Java packages (Beans, JDBC).

```
*************************************************************
```

FIT5900 : Introduction to Multimedia Programming:
http://www.csse.monash.edu.au/~cema/courses/FIT5900/lectNotes.html

These notes cover Introduction to Multimedia, Human Computer Interaction, Interactivity, Information Design and Architecture, Site and Page Design, Typography, Imagery, Color, Sound, Animation, and Javascript and Perl Programming.

```
*************************************************************
```

Business Systems Solutions Using VBA:
http://admin.nj.devry.edu/~jbates/Comp206.htm

This is very helpful to learn about VBA object, properties, methods, and other important programming concepts. From the syllabus, you will find PowerPoint presentations:
http://admin.nj.devry.edu/~jbates/comp206/lecture/.../frame.htm

```
*************************************************************
```

CSCI 203 Introduction to Computer Science I:
http://www.eg.bucknell.edu/~cs203/S2002/
http://www.eg.bucknell.edu/~cs203/S2002/lectures/

This online course makes available very well done lecture notes with nice graphics.

```
*************************************************************
```

Engineering Software Structures:
http://www.qucis.queensu.ca/~elec372/372weekly.html

Lecture slides on Object-Oriented Design and Programming, Software Process, Software Quality, Design Patterns, Software Architecture, and Usability.

****

Fundamentals of Computer Communication:
http://www.cise.ufl.edu/~nemo/cen4500/

Online notes covering Data Transmission, Coding, Synchronization
and Framing, Error Detection and Correction, Data Link Control,
Multiplexing, Circuit-Switching, Packet-Switching, Local and
Metropolitan Area Networks, Protocols and Architecture,
Internetworking, and Protocols.

****

Unix Network Programming with TCP/IP - Client-Server and Internet
Applications:
http://www.hiraeth.com/alan/tutorials/courses/tcpip.html
- You can download the complete notes for this course (688kb, 167
pages):
http://www.hiraeth.com/alan/tutorials/tcpip/TCP-IP-complete.pdf

Unix Systems Programming I & II:
http://www.hiraeth.com/alan/tutorials/courses/unixprog.html
- You can download the complete notes for this course:
Part I notes (531kb, 65 pages):
http://www.hiraeth.com/alan/tutorials/courses/Prog-I.pdf
Part II notes (493kb, 65 pages):
http://www.hiraeth.com/alan/tutorials/courses/Prog-II.pdf

5) The Best Suggested Sites from our Website Users - Every month
we feature the best suggested IT training and tutorial sites from
our website visitors. Here are this month's sites:

Free MCSE Study Material:
http://win2kprof.0catch.com
http://win2kserv.0catch.com
http://netinfra.0catch.com

Training materials and tutorials on the MCSE 70-210, 70-215 and
70-216 certification exams.

****

The Definitive Guide to High-Availability NAS:
http://www.tricord.com/ebook

This free ebook will be published on a chapter-by-chapter basis,
as it is written. Chapters are available for free, registration
is required. The eBook will highlight the following topics:
- Overview of NAS Technology
- Clustering, Designing, Planning for NAS
- Installing, Deploying and Maintaining NAS
- NAS Solutions and Future Directions

****

70-215 Win2000 Server Practice Test Engine:
http://www.fravo.com/download/win2000.exe

Fravo Technologies recently updated their 70-215 test preparation tool, which is available to you Free. Open the downloaded file, click on "Unzip" (Not "Run Winzip"), and the folder, containing your Test Engine, will be installed on C:\Fravo. Includes samples of their other MCSE test engines.

****

Windows XP Pro exam 70-270 Training Kit book (9.1 mb):
http://pdforgyu5.hotmail.ru/

Windows XP Pro exam 70-270 Exam Prep book (7.1 mb):
http://pdforyu10.hotmail.ru/

****

Examguides.com:
http://www.examguides.com/

Offers exam cram notes for CCNA, CCDA, CCNP, MCSE, A+, Network+, Server+, CheckPoint CCSA, CIW and others.

****

Certexams.com:
http://www.certexams.com/

Offers practice questions and cram notes for IT certification exams including CCNA, CCNP, MCSE, A+, Server+, Network+, and CheckPoint tests.

8) I.T. Sites Worth Mentioning:

Read Oracle's latest white paper: "J2EE and Microsoft .NET:
http://www.oracle.com/ip/develop/ids/jdevdocs/J2EEandNET_wp.pdf

Free Windows Utilities:
http://www.cybertechhelp.com/html/downloads.shtml

Find many excellent free utility programs to help you configure
and get the most out of Windows. Here are some of them:

Registry Tools:
Tools to clean your registry, and a beginners guide to how it
works.

IconShop:
Read & Write *.ICL icon libraries. Extract icons from Windows
icons, cursors, animated cursors and more.

MaxMem:
Realtime memory manager that ensures you have the most physical
RAM available to you as possible.

==
==

9) Frequently Asked Questions about Technical Training:

Each month Scott Turton will answer one of the frequently asked questions we receive about computer and IT training and career development.

June 2002 FAQ: What are some good techniques on how to remember and study effectively?

Answer:

When studying, you need to master the material and hold it in your mind in an organized format so that you can access it later. Your purpose and motivation make it possible for you to recall facts; have a special reason or purpose for remembering. Here are the four methods to use to remember material and facts:

- Association: When you associate, you make the things you want to remember relate to each other in some way. Once you know what your purpose is, remember the information by it into a pre-defined category.

- Visualization: When you picture in your mind what you need to remember, the information will be more easily stored and retrievable. Visualization helps you to create a strong, vivid memory.

- Concentration: this is focusing attention on one thing and to one thing only. Visualizing, by forcing attention to one thing only, will help you learn how to concentrate better. Not looking back will also help you to concentrate. Making sure of your purpose in a third way to force concentration.

- Repetition: Repeating the procedures for associating, visualizing, and concentration will help burn the information into your memory. The first step in remembering a list, for example, is to categorize it (association) and visualize it (thus forcing concentration). Do this once and then repeat the same task frequently.

There are several basic principles to successful studying. For Memory, practice recitation until your recall is reliable. For Understanding, explain concepts or the significance of examples aloud, as if you were teaching someone else. For Use, solve problems and try to combine them in new ways. For Analysis, try to predict questions that compare and contrast larger amounts of information. Use study tools such as charts, graphs, mindmaps, outlines. Create simple matrices that allow you to organize comparative information. One dimension lists the topics and the other lists characteristics. Another tip is to study more than you believe necessary.

Here are some good online resources for learning how to study more effectively:

http://www.csbsju.edu/academicadvising/helplist.html
Study Skills Guide

http://www.nursehealer.com/StudyTips.htm
Study Tips, with lots of web resources

http://www.tipsofallsorts.com/study.html

*** Intelinfo.com's Member Site ***
http://www.intelinfo.com/sign-up/index.html

Our Members' Site contains the web's best computer and IT
training resources and tutorials. This content is individually
linked and presented in a way to expedite and facilitate your IT
learning experience. We have done all the web research and
presentation work for you so you can concentrate solely on your
computer training.

Intelinfo.com Member Site FAQ:

1. Over half of the web sites and pages in our members site are
not in the free section of our web site. The online training
resources in our members' site are linked and laid out in a much
more detailed fashion than those in the free section. This will
save you time in finding all the best free training on the web.

2. If you use a credit card when joining, it will be billed by Verotel. When your membership period expires, you will be asked if you want to renew your membership, you will not be automatically charged another fee on your credit card or check.

3. You can also use PayPal to sign-up as a member of Intelinfo.com, just use this link: <http://www.intelinfo.com/links/become_a_member.html>. If you register to pay $10.00 via PayPal using this method, simply tell us in the 'Special Instructions' what you want for your user name and password.

4. If your country is not listed in the drop-down list, please use 2checkout.com to register as an intelinfo.com site member using this link: <http://www.intelinfo.com/links/intelinfo_member.html>. I will then send you an email asking what you would like to use for your user name and password.

The total price to join our member's site is only $10 total for 2 months. The funds generated will assist us to help all those seeking IT education and application development training. Here's the link to see what's available on our member's site and to sign up: <http://www.intelinfo.com/sign-up/index.html>.
