## 1) Editor's Greeting:

Hello everyone, and welcome to our new subscribers!

This is the 2nd edition of our February 2003 issue of our free semi-monthly newsletter for Computer IT Education, Training, & Tutorial Resources providing you with the latest Free online IT Training Resources that we have recently discovered and researched. This newsletter is free to anyone subscribing (instructions at bottom, no username/password is needed). To access our member site, however, you do need a user name and password - registering as a member of Intelinfo.com costs \$10 for two months, for more information please see below 'Become a Member of Intelinfo.com'.

My desire is that these free resources will help you with your computer education and training and are tools to advance your IT career. Our main mission is the training of those less fortunate who are seeking to become computer literate, both technically and from a user's perspective.

In this issue we describe and link to a total of 35 computer, IT and programming learning and tutorial web sites. By means of this email newsletter, you have knowledge of and access to these sites before our web site visitors do. This newsletter is also available to subscribers in HTML format at this special url: [http://www.intelinfo.com/current\\_news-2.html](http://www.intelinfo.com/current_news-2.html)

\*\*\*Current News \*\*\*

We have been working on our new end-user training site and will have it ready soon.

I wish you the best with your computer studies and learning.

Warm Regards,  
Scott Turton Newsletter Editor and Webmaster

## **8) Frequently Asked Questions about Technical Training:**

Each month Scott Turton will answer one of the frequently asked questions we receive about computer and IT training and career development.

February 2003 FAQ #2: I want to learn about Clustering technologies and how to cluster computers together.

Answer: There are various technologies and methods related to networking computers together in clusters. Here are some good, online resources to help you learn how to do this.

Cluster Computing Info Centre:

<http://www.buyya.com/cluster>

Look at the presentation slides, free software, and documentation links.

PDC User Training:

<http://www.pdc.kth.se/training/>

The Center for Parallel Computers training activities are intended to make high-performance, parallel computing more accessible, click on the Learning Materials

links.

Documentation:

<http://lcic.org/documentation.html>

This page contains links to documentation on all three types of Linux clustering, as well as general Linux documentation that you might find useful while dealing with the normal operating system aspects of Linux.

Open Source Cluster Application Resources, talks and articles:

<http://oscar.sourceforge.net/papers.php>

Strictly On-Line: A High-Availability Cluster for Linux

<http://www.linuxjournal.com/article.php?sid=3247>

Linux High Availability Cluster Checklist

<http://www.linuxjournal.com/article.php?sid=4344>

Clustering Technologies for Windows 2000 Advanced Server and Datacenter Server: <http://www.microsoft.com/.../clustering/default.asp>

I hope this helps you.
